In this project you will be working on two different datasets in which one dataset contains news headlines with unlabeled sentiments. And another dataset contains labeled tweets from the twitter data.

Twitter Data:

Feature	Description
ID	Id of the tweet
Brand	Brand associated with the tweet
Sentiment	Sentiment Label for the tweet
Phrase	The actual phrase

News.csv:

Feature	Description
Time stamp	Date of the headline
Headline	Headline phrase

Tasks To be Performed:
1. Transform the Text data to be processed for Sentiment Analysis
2. Generate Sentiments for unlabeled news headlines data.
3. Evaluate the sentiment analysis models based on accuracy.
